# TUSHAR CHAWLA

## Full Stack Developer

+91-8570024468 tusharchawla2002@gmail.com linkedin.com/in/tushar-chawla30 Portfolio

## Summary

Full Stack Developer with 1.5 years of experience shipping production features end to end, from multi-tenant SaaS backends to interactive 3D and AR experiences for brands like Royal Enfield. Works AI-first, using AI coding agents and prompt engineering daily to build, test and document features faster.

## Skills

**Languages:** JavaScript, Python, C++
**Frontend:** React.js, Next.js, Tailwind CSS, Three.js,Redux
**Backend:** Node.js, Express.js, Nest.js, MongoDB, PostgreSQL, Redis, REST APIs
**Tools & Technologies:** Docker, AWS, Git, GitHub Actions
**AI Tools:** Claude Code, Cursor, ChatGPT, OpenAI API, Prompt Engineering, AI-assisted testing

## Experience

**Freelance Backend Developer – Coworking SaaS Platform** **June 2026 – Present**

- Built multi-tenant features on **NestJS + PostgreSQL**, adding **tenant data isolation** to onboard a second client.
- Replaced Trigger.dev with an in-house **Bull/Redis email queue worker**, removing a third-party dependency.
- Integrated **Zoho CRM** to auto-create leads from site visits and built a **sales pipeline** module on existing lead data.
- Designed **seat-hold states** (Proposed/Booked) for proposals to prevent coworking seats being double-sold.
- Secured document access with **AWS S3 pre-signed URLs** while keeping legacy-bucket files accessible.

**Full Stack Web Developer - Kalvig Technologies** **April 2025 – January 2026**

- Built a **JSON-driven 3D hotspot system** in **Three.js** for **Royal Enfield** motorcycle showcases, letting the team add interactive hotspots through configuration instead of code.
- Prototyped an **OpenAI-powered WhatsApp campaign** for a leading FMCG brand: users chose a good-habit quote and uploaded a photo, shown on a **3D photo frame** (**Three.js**) in **AR/VR** and a **3D museum**.
- Built a **3D sofa configurator** prototype in **React.js** letting users switch fabric, color and legs in real time.

## Projects

**Portfolio Generator** - Live Demo | GitHub **February 2026 – March 2026**

- Built a web application for creating and publishing portfolios using customizable templates.
- Enabled real-time preview and editable sections for better user experience.
- Developed secure authentication, OTP-based email verification, and a password reset flow.
- Designed a template management system, allowing users to customize and publish portfolios with reusable layouts.

**Quiz Forms Web App** - Live Demo | GitHub **January 2025 – March 2025**

- Developed a drag-and-drop form builder supporting 3+ customizable question types.
- Built an AI question generator with the OpenAI API. It turns a plain-English prompt into a ready-to-edit Categorize, Cloze or Comprehension question.
- Implemented Google OAuth and email-OTP sign-in with JWT in httpOnly cookies, plus API rate limiting, for a frontend and backend deployed separately on Vercel.

## Education

**B.Tech in Computer Science** **Graduated: 2024**
*TITS College, Bhiwani* *Percentage: 76%*

**12th Non Medical** **Graduated: 2020**
*Vaish Model Sr. Sec. School, Bhiwani* *Percentage: 93.8%*
